EDUCATION

RAIT, UNIVERSITY OF MUMBAI

B.E IN ELECTRONICS AND

TELECOMMUNICATION

Jul 2023 | Mumbai, India

Cum. GPA: 8.52

NEW ENGLISH HIGH SCHOOL

HSC - 12th

May 2019 | Mumbai, India

Percentage: 61.84

KATRAP VIDYALAYA

SSC - 10th

Jul 2017 | Mumbai, India

Percentage: 74.40

SKILLS

PROGRAMMING

JAVA • C/C++ • Python

JavaScript

WEB TECHNOLOGIES

React.js • JavaScript • JDBC

Bootstrap • Node.js • Selenium

TECHNOLOGY

Git/Github • Linux • Agile

JIRA • Jenkins

DATABASE

SQL • MongoDB

ADDITIONAL INFO

CERTIFICATION

- Java Certification Course
- ChatGPT Prompt Engineering for Developers
- Accelerated JavaScript Training
- SQL Certification
- POSTMAN API Testing
- WebServices/Rest API Testing with SoapUI
- Learn Selenium with Java, Cucumber & Frameworks

EXPERIENCE

COGNIZANT | PROGRAMMER ANALYST TRAINEE

Dec 2023 - Present | Pune

- Worked as an automation tester on the Gilead project, utilizing Cognizant's **Java-Selenium Craft Framework** for comprehensive testing and automation solutions.
- Gained hands-on experience with **Java development**, **JDBC**, and web technologies like **JSON**, **XML**, and **JavaScript**, applying these skills across multiple projects to master these concepts.
- Automated functional testing processes using **TestNG** and **Selenium** for websites like PolicyBazaar and beCognizant, adhering to the Waterfall model within the **SDLC**. Conducted compliance testing and identified bugs to enhance platform reliability.
- Implemented BDD using Cucumber for PolicyBazaar, improving automation efficiency, testing processes, and fostering better collaboration between development and testing teams.

PROJECTS

POLICYBAZAR - AUTOMATION (Link)

Automation Project - Java Selenium | AUGUST 2022 – APRIL 2023

- **Java Selenium Automation:** Utilized **Java Selenium** to develop robust and scalable automation scripts for the PolicyBazaar application.
- **Pop-Up Handling:** Leveraged Selenium's advanced features to manage and automate various pop-up scenarios, ensuring uninterrupted test execution.
- **Reporting with Extent Reports:** Implemented Extent Reports to generate detailed and visually appealing test execution reports, providing insights into test results and enabling effective issue tracking.

HEALTH CARE DASHBOARD (Link)

June 2024 – July 2024

- The Health Care Dashboard, made using **React.js**, centralizes patient profiles, offering easy access to personal details, medical histories, previous consultations, and treatment outcomes in a user-friendly interface.
- It features visual representations of blood pressure charts (systolic and diastolic) made using **Chart.js**, and calculates averages for vital signs such as blood pressure, respiratory rate, and heart rate.
- The dashboard includes an organized list of diagnosed medical problems with detailed descriptions and status updates, enabling efficient tracking and management of each condition. It provides a consolidated view of all lab reports.

CRYPTOLENS (Link)

Oct 2023 – Nov 2023

- Developed a product for cryptocurrency analysis web application called CryptoLens using **React.js**, focusing on robust coding practices and product development.
- Utilized the **CoinGecko API** to fetch live data for cryptocurrency analysis.
- Implemented a technical feature to compare two different coins within the application.
- Integrated **Chart.js** library for visualizing cryptocurrency price trends.
